Consent and Release from Liability Certificate for Concussions (Page 2 of 4)

This completed form must be kept on file by the school. This form is valid for 365 calendar days from the date of the most recent signature.

School: _____ School District (if applicable): _____

Concussion Information

Concussion is a brain injury. Concussions, as well as all other head injuries, are serious. They can be caused by a bump, a twist of the head, sudden deceleration or acceleration, a blow or jolt to the head, or by a blow to another part of the body with force transmitted to the head. You can't see a concussion, and more than 90% of all concussions occur without loss of consciousness. Signs and symptoms of concussion may show up right after the injury or can take hours or days to fully appear. All concussions are potentially serious and, if not managed properly, may result in complications including brain damage and, in rare cases, even death. Even a "ding" or a bump on the head can be serious. If your child reports any symptoms of concussion, or if you notice the symptoms or signs of concussion yourself, your child should be immediately removed from play, evaluated by a medical professional and cleared by a medical doctor.

Signs and Symptoms of a Concussion:

Concussion symptoms may appear immediately after the injury or can take several days to appear. Studies have shown that it takes on average 10-14 days or longer for symptoms to resolve and, in rare cases or if the athlete has sustained multiple concussions, the symptoms can be prolonged. Signs and symptoms of concussion can include: (not all-inclusive)

- Vacant stare or seeing stars
- Lack of awareness of surroundings
- Emotions out of proportion to circumstances (inappropriate crying or anger)
- Headache or persistent headache, nausea, vomiting
- Altered vision
- Sensitivity to light or noise
- Delayed verbal and motor responses
- Disorientation, slurred or incoherent speech
- Dizziness, including light-headedness, vertigo(spinning) or loss of equilibrium (being off balance or swimming sensation)
- Decreased coordination, reaction time
- Confusion and inability to focus attention
- Memory loss
- Sudden change in academic performance or drop in grades
- Irritability, depression, anxiety, sleep disturbances, easy fatigability
- In rare cases, loss of consciousness

DANGERS if your child continues to play with a concussion or returns too soon:

Athletes with signs and symptoms of concussion should be removed from activity (play or practice) immediately. Continuing to play with the signs and symptoms of a concussion leaves the young athlete especially vulnerable to sustaining another concussion. Athletes who sustain a second concussion before the symptoms of the first concussion have resolved and the brain has had a chance to heal are at risk for prolonged concussion symptoms, permanent disability and even death (called "Second Impact Syndrome" where the brain swells uncontrollably). There is also evidence that multiple concussions can lead to long-term symptoms, including early dementia.

Steps to take if you suspect your child has suffered a concussion:

Any athlete suspected of suffering a concussion should be removed from the activity immediately. No athlete may return to activity after an apparent head injury or concussion, regardless of how mild it seems or how quickly symptoms clear, without written medical clearance from an appropriate health-care professional (AHCP). In Florida, an appropriate health-care professional (AHCP) is defined as either a licensed physician (MD, as per Chapter 458, Florida Statutes), a licensed osteopathic physician (DO, as per Chapter 459, Florida Statutes). Close observation of the athlete should continue for several hours. You should also seek medical care and inform your child's coach if you think that your child may have a concussion. Remember, it's better to miss one game than to have your life changed forever. When in doubt, sit them out.

Return to play or practice:

Following physician evaluation, the *return to activity process* requires the athlete to be completely symptom free, after which time they would complete a step-wise protocol under the supervision of a licensed athletic trainer, coach or medical professional and then, receive written medical clearance of an AHCP.

For current and up-to-date information on concussions, visit <http://www.cdc.gov/concussioninyouthsports/> or <http://www.seeingstarsfoundation.org>

Statement of Student Athlete Responsibility

Parents and students should be aware of preliminary evidence that suggests repeat concussions, and even hits that do not cause a symptomatic concussion, may lead to abnormal brain changes which can only be seen on autopsy (known as Chronic Traumatic Encephalopathy (CTE)). There have been case reports suggesting the development of Parkinson's-like symptoms, Amyotrophic Lateral Sclerosis (ALS), severe traumatic brain injury, depression, and long term memory issues that may be related to concussion history. Further research on this topic is needed before any conclusions can be drawn.

I acknowledge the annual requirement for my child/ward to view "Concussion in Sports-What You Need to Know" at www.nfhslearn.com. I accept responsibility for reporting all injuries and illnesses to my parents, team doctor, athletic trainer, or coaches associated with my sport including any signs and symptoms of CONCUSSION. I have read and understand the above information on concussion. I will inform the supervising coach, athletic trainer or team physician immediately if I experience any of these symptoms or witness a teammate with these symptoms. Furthermore, I have been advised of the dangers of participation for myself and that of my child/ward.

**Consent and Release from Liability Certificate for
Sudden Cardiac Arrest and Heat-Related Illness (Page 3 of 4)**

This completed form must be kept on file by the school. This form is valid for 365 calendar days from the date of the most recent signature.

School: _____ School District (if applicable): _____

Sudden Cardiac Arrest Information

Sudden cardiac arrest is a leading cause of sports-related death. This policy provides procedures for educational requirements of all paid coaches and recommends added training. Sudden cardiac arrest is a condition in which the heart suddenly and unexpectedly stops beating. If this happens, blood stops flowing to the brain and other vital organs. SCA can cause death if it's not treated within minutes.

Symptoms of sudden cardiac arrest include, but not limited to: sudden collapse, no pulse, no breathing.

Warning signs associated with sudden cardiac arrest include: fainting during exercise or activity, shortness of breath, racing heart rate, dizziness, chest pains, extreme fatigue.

It is strongly recommended all coaches, whether paid or volunteer, are regularly trained in CPR and the use of an AED. Training is encouraged through agencies that provide hands-on training and offer certificates that include an expiration date.

Automatic external defibrillators (AEDs) are required at all FHSAA State Series games, tournaments and meets. The FHSAA also strongly recommends that they be available at all preseason and regular season events as well along with coaches/individuals trained in CPR.

What to do if your student-athlete collapses:

1. Call 911
2. Send for an AED
3. Begin compressions

FHSAA Heat-Related Illnesses Information

People suffer heat-related illness when their bodies cannot properly cool themselves by sweating. Sweating is the body's natural air conditioning, but when a person's body temperature rises rapidly, sweating just isn't enough. Heat-related illnesses can be serious and life threatening. Very high body temperatures may damage the brain or other vital organs, and can cause disability and even death. Heat-related illnesses and deaths are preventable.

Heat Stroke is the most serious heat-related illness. It happens when the body's temperature rises quickly and the body cannot cool down. Heat Stroke can cause permanent disability and death.

Heat Exhaustion is a milder type of heat-related illness. It usually develops after a number of days in high temperature weather and not drinking enough fluids.

Heat Cramps usually affect people who sweat a lot during demanding activity. Sweating reduces the body's salt and moisture and can cause painful cramps, usually in the abdomen, arms, or legs. Heat cramps may also be a symptom of heat exhaustion.

Who's at Risk?

Those at highest risk include the elderly, the very young, people with mental illness and people with chronic diseases. However, even young and healthy individuals can succumb to heat if they participate in demanding physical activities during hot weather. Other conditions that can increase your risk for heat-related illness include obesity, fever, dehydration, poor circulation, sunburn, and prescription drug or alcohol use.

By signing this agreement, the undersigned acknowledges that the information on Sudden Cardiac Arrest and Heat-Related Illness have been read and understood. I acknowledge optional educational opportunities in cardiac arrest at www.nfhslearn.org. Please go to www.fhsaa.org/departments/health for further instructions to view the courses. I have been advised of the dangers of participation for myself and that of my child/ward.

SPORTS CONCUSSION TESTING PROGRAM and RELEASE OF INFORMATION

I understand that pre-concussion baseline testing and post-concussion testing will be administered at my son/daughter's high school, and is part of the procedure for guiding their return to sports participation after the injury. This testing is only one part of the criteria that will be used to determine the student's ability to return to play.

Procedures

- If my son/daughter sustains a concussion, the post-injury test will be administered by the athletic trainer when my son/daughter is asymptomatic. This post-injury test result will be compared with the baseline test.
- The post-injury test results will be reviewed by the certified athletic trainer with the authorized consulting Health Care Provider to advise a next course of action.
- Upon written request, a copy of the post-injury test results will be sent to me.
- I may choose to consult with a concussion specialist outside of the school system at my own cost to assist my son/daughter's recovery. The athletic trainer will work with this consultant to coordinate care.

Limitations on Use of Information

- I understand that the concussion baseline is designed only for concussion management and not as an IQ test and will not be used for educational planning or placement decisions.
- It is important to recognize that blows to the head can cause a variety of injuries other than concussions (e.g., neck injuries, more serious brain injuries). The sports concussion program is designed for concussions only. You must see your doctor as soon as possible to address any other medical concerns.

Storage, Use of Information, Persons Authorized Access, and Confidentiality

- Manatee County School District (MCSD) will appropriately safeguard protected individually identifiable health information made available to or obtained by MCSD from its students. MCSD will comply with applicable legal requirements relating to protected Health Information.
- Only the following individuals will have access to the test results: School athletic trainer, consulting neuropsychologist, Coordinator of Facilities, Athletics and Activities, and any physician designated by parent/guardian.
- Information about the student's recovery may be provided to the school nurse, guidance counselor, school psychologist, and/or teachers to provide temporary health or academic support.
- Upon written request, a copy of the post-injury test results will be sent to me in writing and, if I request, to my designated physician.

Acknowledgement and Consent

I have read this document completely and I understand the terms and conditions set forth above under Procedures, Limitation on Use of Information, and Storage, Use of Information, Persons Authorized Access, and Confidentiality. I understand that this testing program is a mandatory requirement of sports participation except for the sports of corollary sports, cross country, golf, tennis, indoor track, and outdoor track with the exception of the pole-vault and high jump events. The concussion testing program is available on a voluntary basis to those students not mandated to be tested. I consent to the administration of the concussion testing of my child under this program and to the release of my child's testing information and related protected health information to the individuals specified in this form.

**MANDATORY STUDENT INSURANCE/ATHLETIC PARTICIPATION FEE
INFORMATION FOR HIGH SCHOOL PARENTS 2017-2018**

Students, who participate in interscholastic athletics, including cheerleading/dance team and marching band, are required to purchase student athlete basic accident insurance provided through the school district before they are allowed to participate. One of the major costs of athletic participation are insurance coverages. The School District of Manatee County has chosen School Insurance of Florida to provide basic student accident insurance protection. If you have a son/daughter that participates in interscholastic athletics, cheerleading and/or marching band, it will be necessary for you to contact the athletic director, cheerleading coach or marching band director at his/her school to get information on how to sign up and pay the participation fee. The basic insurance is not designed to replace family insurance. You are encouraged to pay for and have health insurance coverage for your student in addition to this coverage. **Public School Districts are not responsible for accidental injuries that may happen while playing sports.**

This accident insurance is a supplemental or excess plan and will not pay 100% of the bills. The deductible for this plan is \$50.00 with a maximum benefit of \$25,000.00 for any one covered accident, which is in excess of the amount from other collectible insurance or health plans you may have. More complete policy terms, provisions, benefits and exclusions are available on line at www.schoolinsuranceofflorida.com or you may call 800-432-6915.

How to file a claim for an athletic injury:

1. The student **MUST** report the injury to the coach immediately and **MUST** see a doctor within 30 days of the date of injury.
2. Obtain a claim form from the school or go online at www.schoolinsuranceofflorida.com. The school will provide you with a summary report to be attached to the claim form. The claim cannot be processed without the claim form. You may contact the insurance company directly at 800-432-6915 for assistance.
3. Fill in the requested information on the claim form and **SIGN IT**. Do NOT leave the form at the doctor's office. Send the claim form and itemized bills to the claims address on the claim form. It is not necessary to wait until treatment is complete to send the claim; however, only the claim form must be received within 90 days of the injury. If you have other applicable insurance, you must also file with that company; when you receive the Explanation of Benefits (EOB's) from them showing what has been paid, forward these to the school insurance company. **KEEP A COPY OF ALL PAPERWORK FOR YOUR RECORDS**. Do not hesitate to contact the insurance company for any questions-student insurance is their only business and they have staff to assist you. You have one year to submit the medical bills.
4. Filing a claim after an injury is **YOUR** responsibility. Under HIPAA or privacy laws, the agent and/or an employee of the School Board cannot file the claim for you nor can they obtain claims information from an insurance company without your written permission.
